## Team 3

Screening Instructions: The pallina ball (small yellow or white ball) should be placed 50 feet away from the start line. Each athlete will stand behind the start line and throw all eight bocce balls toward the pallina ball. When all eight bocce balls have been thrown, measurement should be taken from the center of the pallina ball to the side of the closest two bocce balls. Record measurement in inches of those two bocce balls and then figure the average of the two. Repeat this for every athlete being registered.

Ex. Ball 1 - 25 inches , Ball 2 - 37 inches; 25 inches plus 37 inches equals 62 inches. 62 inches divided by 2 equals 31 inches.
